

Acacia verticillata

Prickly Moses

Height:	2m - 3m
Width:	3m - 5m
Habit:	Variable open prickly shrub.
Foliage:	Fine green to dark green prickly phyllodes (leaves) to 2cm long.
Flowers:	Light yellow bottlebrush shaped flower spikes in June to December.
Requirements:	Likes well drained soil, but tolerates most conditions, including alkaline soils and periods of waterlogging. Partial sun.
Cultivation & uses:	Pruning whilst young encourages a bushy habit. Provides good refuge for birds.

Local Distribution:

Map is indicative to the natural distribution of the species based on the best available knowledge.

The natural occurrence of this species is moderate.
