

Dianella revoluta

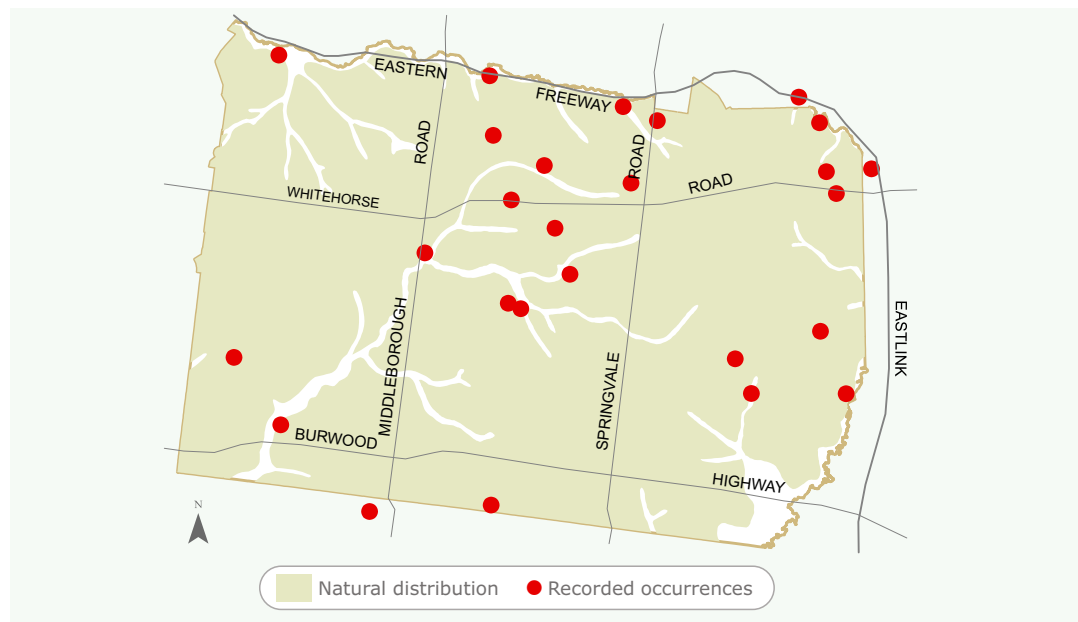

Black Anther Flax-lily, Spreading Flax-lily

Height:	0.3m - 1m
Width:	0.5m - 2.5m
Habit:	Dense tufted perennial, spreading by vigorous branched underground stems.
Foliage:	Dark green long strap-like leaves to 70cm long.
Flowers:	Blue to violet flowers with open spreading petals bending back on branched wiry stems to 1m high. Flowers from August to May, followed by blue to purple berries.
Requirements:	Well drained soils, adaptable to a range of conditions. Full or partial sun.
Cultivation & uses:	A very hardy and tolerant clumping plant once established. Ideal for growing close to or beneath trees and is very effective in mass plantings. Provides a decorative interest for drier gardens, cottage gardens and rockeries. Plants grows more vigorous where moisture is available. Drought and frost resistant.
