

Kunzea ericoides

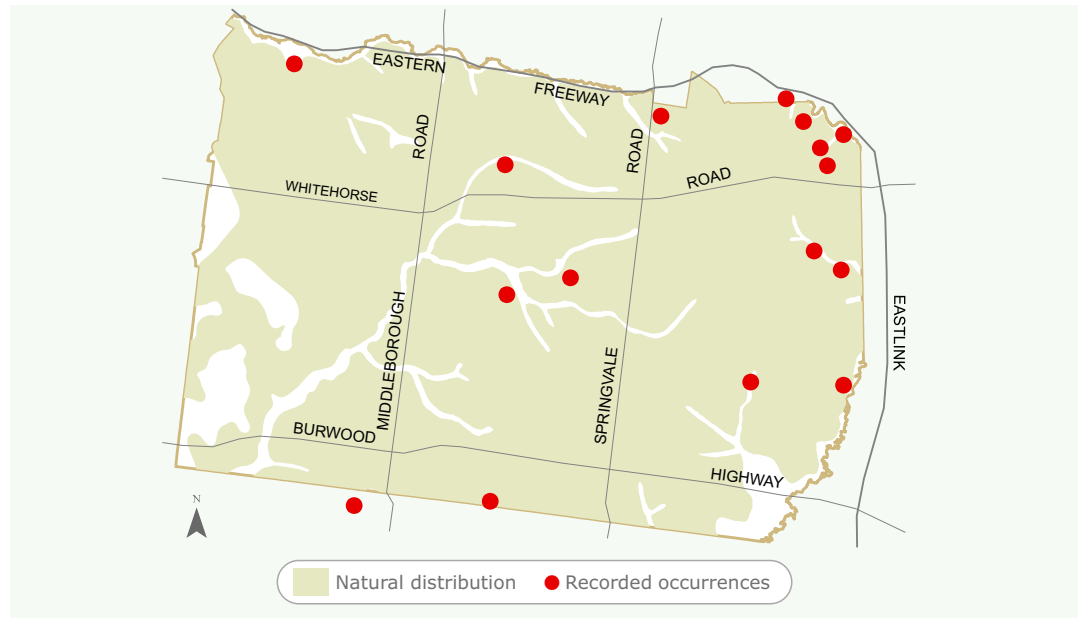

Burgan

Height:	2m - 5m
Width:	2m - 4m
Habit:	A fast-growing dense to open weeping shrub.
Foliage:	Aromatic small, narrow, dark green leaves to 8-25mm long.
Flowers:	Masses of white flowers along stems from November to February.
Requirements:	Adaptable, tolerating wet and dry periods. Full or partial sun.
Cultivation & uses:	An attractive shrub, particularly the weeping form. Excellent screening plant. Prune to encourage bushiness, tolerates hard pruning. It has the potential to revegetate cleared or disturbed areas quickly.

Local Distribution:

Map is indicative to the natural distribution of the species based on the best available knowledge.

The natural occurrence of this species is moderate.
